BEYOGLU INTERNATIONALE
SPEDITION GMBH

ABOUT THE COMPANY

BIS (Beyoglu Internationale Spedition GmbH) is an international shipping and transportation company, which was established in Hamburg in 2007 by experienced industry professionals. As a medium-sized logistics organisation, with a worldwide presence at the most strategically important trading and port centres, we are also proud of ourselves for offering a totally individual service tailored especially to our customers' needs.

Our clients enjoy flexible and tailor-made logistics and transport solutions, coupled with attractive business conditions, available in our one-stop shop.

With almost a century of combined experience, a large office network, qualified staff and a customer oriented approach, BIS offers YOU a "Global Transport Solution".

WE MOVE AND CONNECT THE WORLD • WE BRIDGE YOU TO SUCCESS

BEYOGLU INTERNATIONALE
SPEDITION GMBH

OCEAN FREIGHT

Intercontinental sea freight constitutes our core business. Whether LCL or FCL, we provide our customers with perfect, economical and professional order processing from A to Z with short processing time. We have been cooperating with various shipping lines and worldwide agents for years and we are able to guarantee to our customers the best quality at the best conditions. In both export and import, we serve over 400 ports.

We offer in and outbound Sea Freight traffic as listed below:

- LCL (Less than Container Load) consolidated cargo services
- FCL (Full Container Load) worldwide container shipping
- Special equipment shipments (FR, OT, OH , RF)
- Isotank integrated tank container transport (inbound and outbound)
- Procurement & distribution logistics
- Worldwide logistics
- Door-to-door shipment
- Cross trade shipment
- Daily operations at HAM/ROT/ANT/ZEE/BRV seaports

WE MOVE AND CONNECT
THE WORLD • WE BRIDGE
YOU TO SUCCESS

AIR FREIGHT

For being a fast, safe and reliable transport method, airfreight has achieved enormous growth rates. Transport by air is particularly suitable for shipments of extreme urgency with fast transit time, speed and flexibility allowing the goods to reach the world markets on time. Thanks to our dedicated airfreight service, your valuable goods reach their worldwide destinations reliably, safely and promptly. According to your requirements, we endeavour to ensure a smooth process.

We offer in and outbound Air Freight traffic as listed below:

- Priority airfreight services,
- Economic airfreight services
- Domestic transportation (Germany and Europe wide)
- Partnership with major airlines
- Transit & project air shipments
- Procurement & distribution logistics
- Combined traffic (AIR/SEA)
- Hazardous material shipments
- Customs clearances
- Daily operation at all German airports

ROAD FREIGHT

We, as an experienced forwarding company do not only care about the provision and coordination of the trucks and a timely delivery, but also about the appropriate packaging, storage and transport insurance of the freight.

We offer in and outbound Road Traffic as listed below:

- European road freight distribution and on-carriage services
- European road freight procurement and pre-carriage services
- Full truck loads / FTL
- Less truck loads / LTL
- Consolidated cargo trucking services
- Temperature controlled european trucking services
- Reefer-truck services
- Combined transports road-rail / rail-road
- Oversized (OOG) and heavy cargo trucking services
- Project shipment organization of large lots with customized services
- Cooperation with reliable, qualified carriers and long-term business partners

WAREHOUSING

In order to ensure an optimization of the transport process, we offer large, fixed storing spaces. Weather-sensitive pieces of material can be stored in the enclosed spaces. We store all kinds of goods and are therefore able to offer a complete range of warehouse logistics.

Inventory lists are created for you at least once a month, optimizing the storage space required. Our service includes the commissioning, packaging, un-packaging and pre-assembly of the products from industry and trade. We take care of the planning and design of transshipment activities. With your cooperation, we create an individually developed concept which ensures cost-effective storage, smooth data and information exchange and proper distribution of the goods.

We offer services as listed below :

- Container loading / unloading
- FCL & LCL pack station
- Project and heavy cargo handling,
- Direct transloading truck-container / container-truck
- Container reach stacker for lift-on / lift-off movements up to 42 ton gross weight
- Container storage (also for bonded cargo)
- Warehousing / bonded customs warehouse / customs clearance
- Interim storage for import and export goods
- Shipment securing and packaging
- Container weighting
- Labelling, palletisation, foiling

CROSS-TRADE SHIPPING

At BIS (Beyoglu Internationale Spedition GmbH), we understand that sometimes our customers need to move cargo to and from countries in which they themselves are not based.

That is why we have established our cross-trade team, who can help with queries and bookings outside of the country where your business operates. Our cross-trade teams support you with the full range of containerised freight services, in particular dry cargo,

refrigerated cargo (reefers), out-of-gauge, precious and hazardous cargo. Our team provides comprehensive services that include competitive pricing, securing bookings, documentation handling, tracking facilities and pre/on carriage arrangements. This means that wherever your cargo is transporting to or from, you'll have a dedicated team supporting you, locally.

WE MOVE AND CONNECT THE WORLD
WE BRIDGE YOU TO SUCCESS

PROJECT CARGO HANDLING

With our careful and professional preparation and many years of experience in project loading, we stand by your side and ensure a perfect and safe transport on all traffic routes. By means of your documents / construction drawings, we provide planning and implementation as well as the transport, transshipment and the sea freight for exceptional or non-containerized cargo. We take care of the timely delivery of heavy cargo, loads of extra dimensions or construction vehicles, to the desired destination.

Project Handling

- Transport of goods that cannot be shipped in containers,
- Excess length, excess width, excess height,
- Heavy goods transportation,
- Arrangement of special permits for road haulage,
- Worldwide forwarding service from origin to final destination,
- Expert knowledge in special project handling,
- Documentation in accordance with letter of credit and close cooperation with banks,

Too high?

Specialised vehicles with extremely low lift-over heights provide extra vertical space.

Too long?

Expandable vehicles ensure secure full-length support for your load.

Too heavy?

Flat bed truck combinations with up to 10 axles make almost anything transportable.

Too wide?

With our qualified and experienced staff, we always find the right way. Even, if it gets a bit tight.

CUSTOM CLEARANCE

With our professional customs clearance team,
we offer all kinds of customs clearances at
ROT/HAM/ANT/ZEE/BRV for sea shipments, at
all German airports for air shipments and all
German cross borders for road shipments.

We offer below listed services:

- Import customs clearances,
- Tax declarations for companies based in other EU countries and not having a branch in Germany, pursuant to Section 22 of the german turnover tax law (UStG)
- Transit documents (NCTS-OUT)
- Removal of transit documents (NCTS-IN) as decentralized communication partner (decKP)
- Bonded warehouse clearances
- Active / passive finishing and repacking
- Carnet TIR and ATA declaration,
- Creation of CMR cargo letters
- Creation of export declarations (AES)
- Electronic export control (ZAPP)
- Preparation and neutralization of preference certificates
- Management of your intra-trading statistics (Intrastat)
- Compilation of summary reports (ZM)
- Summarise application
- Change of depository
- "Compliance Check", i.e. all records to reconcile with the current boycott lists
- Delivery services, submission of customs documents within ports

WE MOVE AND CONNECT
THE WORLD • WE BRIDGE
YOU TO SUCCESS

MULTIMODAL TRANSPORT (Rail / Truck and Barge / Truck)

As a cost-effective alternative to truck transport on the road, rail transport is an option. With rail freight, goods can be transported reliably and quickly at favourable rates over medium to long distances. We offer rail loads throughout Germany and Europe in full containers - the european rail network extends from portugal to russia, from polesto to bosporus. Even in places where the width of the railway changes,

there are possibilities for rail transport to carry on the transport. We select the right transport route and the best possible utilization of weight and space according to your requirements and thus ensure the economic preservation of your goods.

We offer rail services from HAM/ROT/ANT/ZEE/BRV for inbound and outbound FCL. In addition, we also offer barge services from ANT/ROT for inbound and outbound FCL.

RO / RO TRAFFIC

BIS is specialized in the worldwide shipment of cars, trucks, trailers and all other self-propelled or rolling cargo.

Operating on the world's most important trade lanes, BIS moves cargo worldwide on modern and technically advanced deep-sea and short-sea RoRo vessels. With a large fleet of flexible vessels used, we are able to transport all types of vehicles, and also oversized static pieces worldwide.

We can offer regular schedules from Hamburg/Tilburg/Antwerp/Le Havre to:

DANGEROUS MATERIAL

Warehousing & Shipping & Transport

Hazardous Materials

Hazardous materials require special handling, but with our knowledge and experience they are just another commodity to be shipped! Handling hazardous materials has been defined by the United Nations in detail and requires special training. There are numerous regulations and agreements concerning transportation of hazardous materials by road, rail, air and sea, including rules on packaging, securing loads, labelling and transportation. There are also specifics concerning drafting the relevant shipping documents.

In many cases, individuals are not aware of the fact that their goods are referred to as hazardous material. Hazardous materials include adhesives (for hatch covers!), fireworks, gasoline, heating oil, lithium-ion batteries (as found in laptops!), certain fertilizers and uninstalled airbags (potentially explosive), hospital waste (potentially infectious), all kind of radioactive materials (such as that used in medical and technical applications), but also substances which may only be very dangerous in large quantities. A truck filled with lighters or spray cans, for example, may thus be considered as a hazardous materials' shipment, even though from the outside it might normally not seem to be the case.

Transport Insurance

Without transport insurance, there is no compensation in the case of natural disasters, damage during loading/unloading, movements of goods, or arising from the fault of third parties. We are experienced in and offer all following services:

- Issuance of insurance certificates in accordance with letter of credit (L/C)
- The policy includes all transportations, independent of the person who arranges the transport
- You save time and you can stop worrying about transport insurance for each section of the transportation route
- Low premium rates as a result of the cargo-partner premium volume
- Low administration effort
- Claims are handled by transport professionals

WORLDWIDE COURIER SERVICE

We enjoy long-standing contracts with the world-famous courier companies like TNT, DHL, UPS, FEDEX, meaning we can offer you attractive express and economic prices for your letters, documents and small shipments worldwide.

WORLDWIDE NETWORK

TERMS OF BUSINESS

We operate exclusively on the basis of the German Freight Forwarders Standard Terms and Conditions (ADSp) latest version applies in each case. Due to Article 23 ADSp, liability for damage/loss to goods according to §431 HGB (German Commercial Codes) is limited

- To 5 EUR/kg whilst in the custody of the freight forwarder
- To 2 SDR/Kg (Special Drawing Rights) for multimodal carriage incl. sea transport
- To 1 million EUR or 2 SDR/kg per claim or to 2 million EUR Or 2 SDR/kg per event, irrespective of the number of claims per event, in each case whichever is higher

If we are liable according to the provisions of the Montreal Convention, Art. 27, ADSp shall not apply. Art 27 ADSp shall also not be considered as an extension of liability through imputation of default by agents, representatives, employees, subcontractors or other third parties in the cases of Art. 36 CIM, Art. 21 CMNI or section 507 HGB. Otherwise clause 27 ADSp shall remain unaltered.

Regarding to § 512.2 HGB (nautical errors or fire on board) we are only liable as a sea carrier in case of our actual fault. Under regulations of CMNI it is agreed that we are not liable for noetic errors, fire on board or ship defects as per Art. 25.2 CMNI (freight forwarder acting as freight carriers).
